## PART 02

# Product Introduction

产品介绍

# Business —

## Rubber Parts —

Our company can according to customer requirements, choose the appropriate rubber material, design formula, mold out high-quality products, to ensure that products meet the special environment requirements (oil resistance, chemical medium resistance, high temperature, low temperature, aging resistance, etc.) to meet customer requirements.

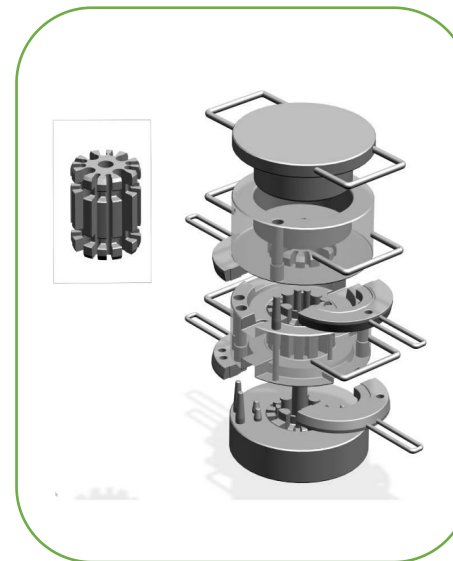

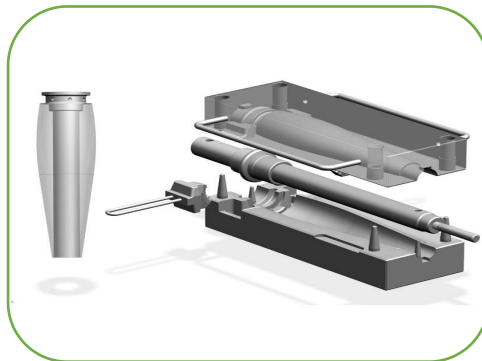

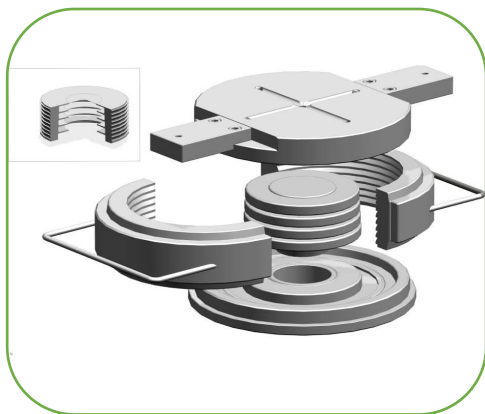

## Plastic Parts

Our company has rich experience in the production of plastic products, and can process plastic products with high design accuracy according to customer needs and drawing samples.

Products are widely used in automotive, electrical and electronic, medical equipment and other industries.

## Mold & Metal Parts

Our company has advanced CNC mold processing equipment, can design molds according to customer needs and drawing samples, process and produce molds and machined parts, and a wide range of applications.

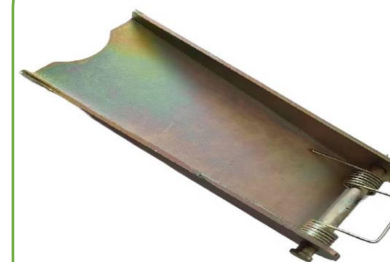

# Metal Punching —

Our company has a number of punching machines, according to customer requirements to provide various specifications of metal products, stable quality, timely delivery.

Products are widely used in automotive, electrical and electronic, medical equipment and other industries.

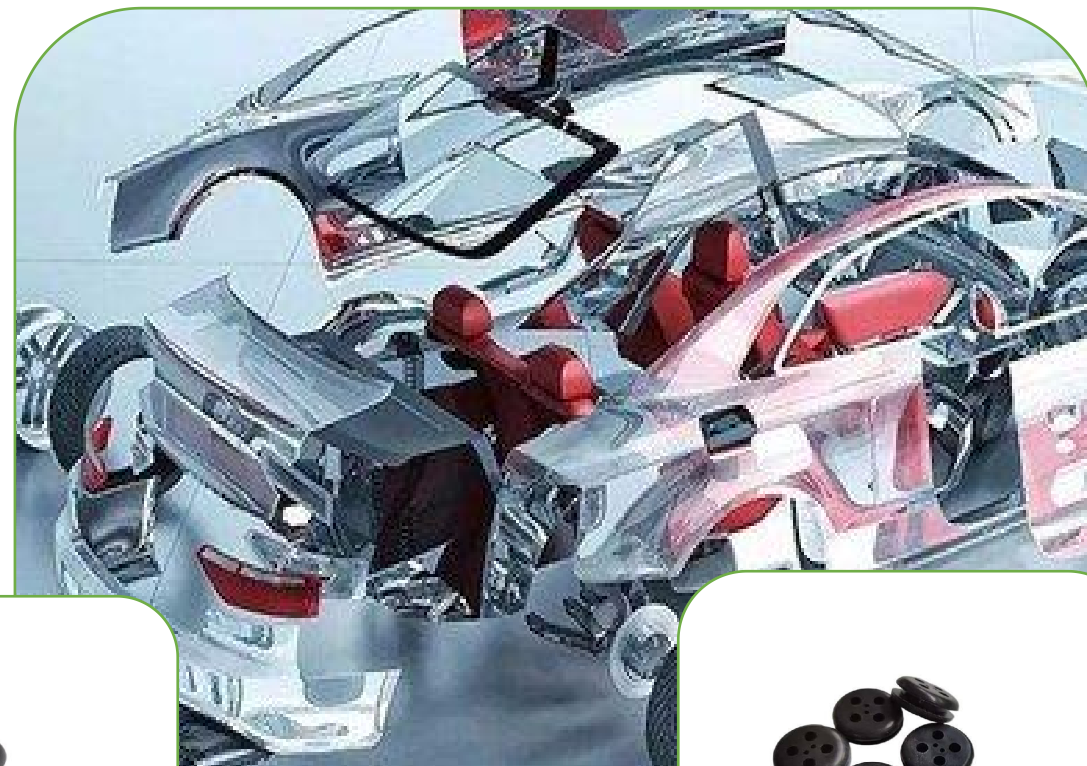

## Extrusion parts

Our company can customize extrusion products, can manufacture plastic extrusion, rubber extrusion products, high production efficiency, good quality, delivery on time, and a wide range of applications.

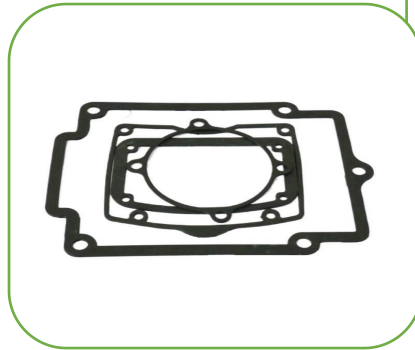

## Application show —

**Application : automotive parts, air conditioning sensors, shock absorbers, seals, sheathing, etc.**

# Application show —

**Application :Construction machinery spare parts**

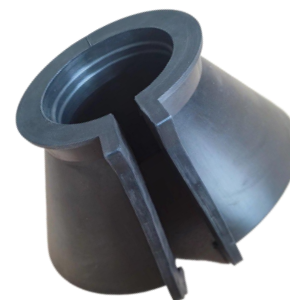

## Production introduction

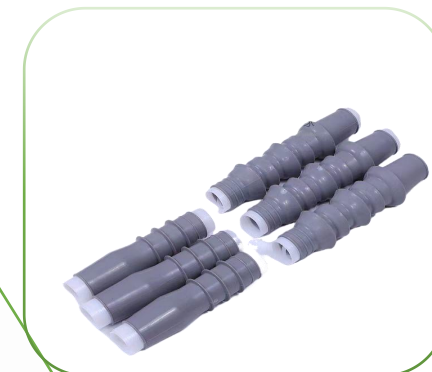

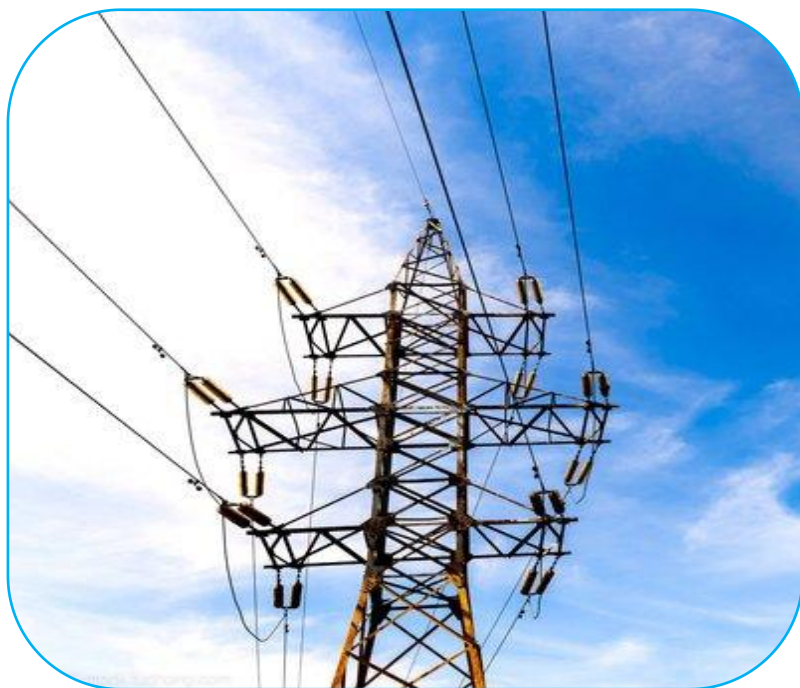

## Application show

**Application :power industry, high voltage cable terminal  
accessories**

## Application show —

**Application :bridge engineering spare parts, shock absorbers  
rain cover, bridge support and etc**

## PART 03

# Enterprise advantage

企业优势

# Enterprise Advantange

Enterprise  
advantage

1

## Profession

With 40 years of experience in customizing rubber and plastic products, we have rich production experience, advanced equipment, and a professional quality inspection system

2.

## Service

Providing a full range of services including design, research and development, production, testing, etc., personalized customization, customer first, and quick response

3.

## Resources

Factory direct supply, over a thousand application formulas and selection solutions, worry free after-sales service

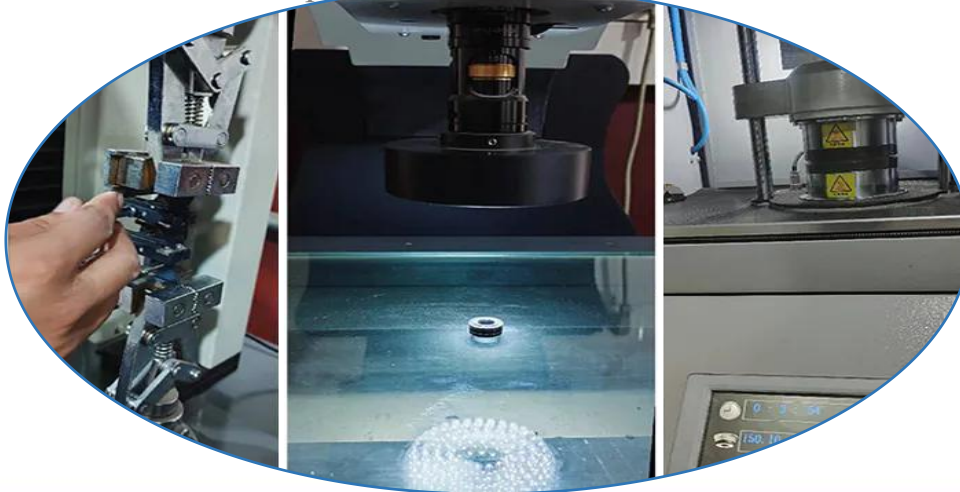

## Quality Assurance

### 1.

#### **Laboratory**

Our company implements strict quality control procedures, from the material to the production process to the final delivery of each link of quality control in place, to ensure customer product quality. We have a dedicated product testing department where we ensure that each and every product we manufacture meets our own exacting standards and customer specifications required.

### 2.

#### **Qualification certification**

We passed the audit and obtained the quality system certificate, Adhering to strict IATF 16949:2016 (TS), ISO 9001-2015, ISO 14001 quality standards

### 3.

#### **Third party testing**

In the services provided to customers, if third-party testing is required, additional testing can also be carried out by independent bodies which we work with or, we are happy to work with those nominated by you. We guarantee that specifications are met and in most cases exceeded at all stages of the production cycle.
